Description of Issue:

Stop production for the following parts until further notice from Engineering

Customer Support: Advise existing customers when DSI and service bulletin are created by Engineering

-Feedback from Customer Support indicating that all cases revolve around the -015/-017/-115/-117 (these are the training wearplate bearpaws) with this installed on the helicopter would create a problem with the blade (D2741) not touching the ground and this could create ground resonance and imbalance of the helicopter.(Ref CAR18-275)
